

Hadley Garden Center

2017 FRUIT LIST

Fruit Trees

All Fruit Trees 55.00
Other trees will be marked individually.

Small Fruits

All Raspberries and Blackberries..... 8.99 ea.
 5/40.00
 10/75.00

Strawberries
 Bdl. of 25 15.99
 Blueberries 15.99 & up
 Grapes 34.99
 Rhubarb 13.99
 Horseradish 6.99
(Prices subject to change -(higher or lower depending on availability)

CULTIVARS AVAILABLE

APPLES (2 varieties for pollination)

Early-Season

Gravenstein (*Heirloom variety*)

Mid-Season (September)

Baldwin
 Mutsu
 Royal Gala
 Honeycrisp
 Cortland
 Liberty (*disease resistant*)
 Macoun
 McIntosh
 Empire
 Jonagold
 Spitzenburg (*Heirloom variety*)
 Wealthy
 Zestar

Late-Season (October)

Arkansas Black
 Newton Pippin
 Roxbury Russett (*Heirloom variety*)
 Braeburn
 Red Fuji
 Granny Smith
 Northern Spy
 Pound Sweet (*Heirloom variety*)
 Cox Orange Pippin (*Heirloom variety*)
 Ginger Gold
 Haralson

EDIBLE CRABAPPLE

Whitney

PEACHES (*self-fruitful*)

Early-Season

July Elberta
 Red Haven
 Reliance

Mid-Season

Madison
 Blushing Star
 Belle of Georgia (*white flesh*)
 White Lady (*white flesh*)
 Loring

Late-Season

Cresthaven

PEARS (2 varieties for pollination)

Mid-Season

Bartlett
 Bosc
 Moonglow
 Red Bartlett
 Comice

Late-Season

Kieffer
 Seckel
 Anjou

ASIAN PEAR

Early-Season

Chojuro

Mid-Season

Shinko
 Daisui
 Raja
 Shin Li

NECTARINES (*self-fruitful*)

Red Gold
 Sunglo
 Artic Glo

SWEET CHERRIES (2 varieties for pollination)

Mid-Season

Regina
 Blackyork
 Whitegold
 Hudson
 Blackgold
 Kristin

SOUR CHERRIES (*self-fruitful*)

North Star
 Jubileum
 Montmorency
 Balaton

PLUMS (*somewhat self-fruitful, best results with another variety*)

European varieties

Green Gage
 French Prune
 Stanley
 Damson
 Italian Prune

Japanese varieties (*cross with another Japanese variety*)

Alderman
 Red Ace
 Shiro
 Santa Rosa
 Elephant Heart
 Methley

APRICOT

Goldcot
 Blenheim
 Chinese

FIG

Lang (*dwarf*)**ELDERBERRY**Samdal (*dwarf*)
Samyl**PLANTING THE BACKYARD GARDEN****Fruit Trees**

Site and soil requirement - Full sunlight, good drainage, but ample moisture. Avoid planting in cold pockets. pH of 6-7.0. Add cow manure and peat moss to soil when planting. **DO NOT** fertilize the first year. Can be planted as soon as soil is workable. Plant with the graft union above the soil level.

Planting distances - These charts are for your convenience as a general guide in determining how many mature fruit trees will fit in the planting area you have available. A mature fruit tree normally has a root system at least as wide as the tree is tall.

AREA PLANTING GUIDE

Pruning - Minimal at time of planting. Remove only damaged or crossing branches.

Feeding - One year after planting, fertilize with 1-2 lbs. of a good organic fertilizer in mid-April to mid-May. Add lime to maintain a neutral pH.

Pest control - Use dormant oil spray to control overwintering insects. We carry a complete line of organic pest controls to combat other pest problems throughout the season.

Small Fruits

Strawberries - Will grow in most any soil type with a pH of 5.5 to 6.5. Feed with a 5-10-5 fertilizer. Plant 18" apart in rows 3-4 feet apart. Remove flowers the first year for better production of fruit the next year. Mulch all plants with a loose, weed-free material such as salt hay or straw in mid to late November. Remove mulch from crowns in spring when new growth starts.

Raspberries and Blackberries - Will grow in most any soil type with a pH of 5.5 to 6.5. Set plants 24-30" apart in the row and have 8-10 feet between rows. Fertilize with 1-2 lbs. of organic fertilizer per 100 square feet. Most varieties will benefit from the use of a trellis to keep canes upright and the fruit off the ground.

Blueberries - Grow best in an acid soil with a pH of 4.3 - 4.8. Soil should be well drained. At planting, space 6 feet apart in rows 6 feet apart. Begin pruning at the end of the third season to remove weakened or dead branches. Feed with Hollytone fertilizer. In addition sulphur should be added at least twice a year based on pH test. Keep well mulched.

Grapes - Plant deep so that the soil level is just above the second bud, and cut canes back to 2 or 3 strong buds. After plant is established pruning is done when plant is dormant leaving long healthy canes of 100 buds to bear fruit. Feed with a good quality organic fertilizer such as Plant Tone.
